SNÉCO

CRUNCHY CHEESE BALLS

SNÉCO

The company was established in 2016 as a hobby startup. At that time, we already had another successful business, but we had always been passionate about cheese. So, we began exploring ways to improve upon it. We asked ourselves, 'What can we do better? **What is the cheese of the 21st century?**' Through a gradual process, we discovered an innovative technology for dehydrating cheese, transforming it into a crunchy and even more flavorful form. Moreover, our cheese balls have a long shelf life, eliminating the need for refrigeration. They require no preservatives or flavor enhancers. **Our product is the perfect healthy and natural snack for the modern era!**

The biggest problem we tackled and solved after many experiments was how to make cheese last longer without needing a fridge. You see, cheese usually doesn't last very long and needs to be kept cold. For example, Mozzarella only stays good for a few weeks at temperatures between 3 to 9°C.

But with **snEco's** dried cheese products, we've extended the shelf life to **up to 24 months**, and you don't need any special storage or transport conditions. Our products have almost no water in them and can be kept at temperatures between **0 to 30°C**.

SNÉCO

main product advantages:

- crunchy and tasty unique snack
- 100% natural cheese
- only one ingredient - cheese
- high in protein (up to 60%)
- NO suragar, LOW carbs
- 100% gluten free
- no additives, colorants etc.
- long shelf life (up to 24 months)
- no fridge needed (0 to 30°C)
- great as a stand alone snack, as an ingridient of meal (soup, salad), or an addition to favorite drinks: coffee, wine, beer etc.

ALL OUR PRODUCTS ARE MADE USING SOLAR-POWERED ELECTRICITY!

snEco doesn't compete—it elevates!

Growing the category, not cannibalizing sales.

snEco introduces a unique, innovative snacking experience that doesn't replace existing products but expands consumer choices. As a high-protein, gluten-free, and natural cheese snack, it appeals to health-conscious and premium buyers who may not typically purchase conventional snacks. Its versatile usage (bar snack, salad topping, gourmet addition) attracts new consumers, creating incremental sales and driving category growth, rather than shifting sales from existing products. 📈 Proven Sales Performance

✔ **+126%** average sales increase during promo (Auchan, Silpo, Novus, WOG etc.)
✔ **100%** reorder rate from ALL key partners
✔ Expanded shelf space in Silpo, Fozzy & Auchan due to strong demand

🚀 **snEco Grows the Category:**

- +11% category growth in high-protein & functional snacks
- No cannibalization: Attracts new customers to cheese snacks
- Drives impulse purchases & premium positioning.

WE’RE BACKED BY YEARS OF EXPERIENCE!

Already exporting to:

- USA
- Japan
- UK
- Poland
- Czech Republic
- Germany

and more! Our facility is approved by the EU TRACES system, holds FDA certification for the U.S., and has all the necessary certifications and permits for global export and import.

We welcome all forms of collaboration, both in new markets and in the countries mentioned above. Let’s conquer the world together!

NOW ITS TIME TO DIVERSIFY

We are confident that our product has strong potential for global popularity, as shown by the demand we've experienced through numerous exhibitions and trade fairs worldwide. We have received multiple repeat orders from EU and overseas distributors. Recognizing the importance of diversification, we decided to establish a new production facility in Slovakia, EU. This strategic decision will support our expansion, not only within the Europe but on a global scale. **We've already set up SnEco SK, s.r.o. in Humenné**, with all equipment ready to go, and we are proud to announce:
snEco is now **READY** to ship products Made in EU!

WE HAVE THE CAPACITY. WE KNOW HOW TO SCALE.

Current free capacity in Ukraine is **150.000 - 250.000 pcs per month.**

Slovak facility will double this amount to **300.000-500.000 pcs per month.**

And if even greater volumes are needed, we're fully prepared to scale rapidly to meet demand exceeding **1 million pieces per month!**
