1. GENERAL CONDITIONS

SGS UK is acting as accredited certification body according to the ISO 17065 (in current version). The basis is the current and valid requirements of the IFS Certification Programme Owner, IFS Management GmbH (hereinafter referred to as “IFS CPO”). The CP wants SGS UK to perform the product certification. Conditions for this are to sign and send back:

- Registration and Application for Product Certification
- Certification Contract with SGS UK
- Appendix tot he Certification Contract
- Commercial contract between the CP and the party of SGS Group who is realising the audit (hereinafter also referred to as “Delivering SGS Affiliate”).

By signing this application and order for certification a contract with the following content will be concluded between the Client and SGS UK:

Remark: certification service against IFS Wholesale/Cash&Carry standard is provided unaccredited but under the agreement between SGS UK and IFS CPO.

2. SUBJECT OF THE CONTRACT

SGS UK provides the following services:

- Performing the audit based on the checklist of the IFS CPO
- Writing an audit report based on the requirements of the IFS CPO
- Writing a non-conformity report based on the requirements of the IFS CPO
- Declaration of conformity based on the audit report (certificate)

The services of this contract are based on:

- the application and registration for product certification
- audit requirements specified by IFS CPO in the most up-to-date version
- current laws and regulations relevant to the products or processes

The frequency of the audits depends on the requirements specified by IFS CPO.

3. DUTIES AND RESPONSIBILITY OF SGS UK

SGS UK commits itself to do the above mentioned activities in a neutral, conscientious manner, with professional competence and in the sense of this contract. SGS UK commits itself to handle all given information strictly confidentially and to use this information only for the agreed purpose and to give no information to uninvolved third parties (except to IFS CPO, see section 8). SGS UK has and will commit their employees and freelancers to maintain strict confidentialty and non-disclosure about the accessed information, both written and verbally, to uninvolved third parties.

Liability of SGS UK regarding this contract is only possible in the case of intent or gross negligence without any liabilty for consequental loss. Liability of SGS UK for audit services of other parties of the SGS Group is expressly excluded.

4. DUTIES AND RESPONSIBILITIES OF THE CONTRACT PARTNER (CP)

For an effective realization of the audits the CP will consider the following regulations.

- make all documents available that are necessary to perform the audits.
- assure cooperation for proper fulfillment of the contract.
- nominates the appropriate contact person to SGS UK and Delivering SGS Affiliate.
- insures that the company own databases and computer systems do not allow possibilities of systematic or manual manipulation of the process datas.
- commit themselves to inform SGS UK immediately about all major changes of products, processes, self controls/inspections and changes regarding the company organisation, if they are in association with this contract.

- commit themselves to use only authorised and approved statements/logos of SGS UK with reference to product certification in media, documents and other advertising material. The company additionally commit themselves that it immediately ceasea the use all statements/logos in case of loss of certification.
- commit themselves to collect and document all complaints raised to the company regarding the certification and to record all further actions rearding threse.
- commit themselves to fulfil the requirements of IFS CPO also after the audit date throughout the validity of the certification.
- commit themselves not to use the SGS UK reports or parts of the reports in order to to mislead.

5. DOCUMENTATION

SGS UK keeps documents about; information about the company, results of the audits which document the services performed according to the respective focus of the product certification. The retention period of the documents conformed to the regulations of the IFS CPO.

6. COMPENSATION

The invoice of the services specified in this contract will be done by the party of the SGS Group with whom the CP signed the commercial contract (Delivering SGS Affiliate).

7. PERSONNEL

SGS UK allocates qualified personnel for performing the audits, which will follow the legal requirements and particularly the additional requirements of the IFS CPO.

8. ANNOUNCEMENT

Irrespective of section 3 paragraph 1 but according to requirements of the IFS CPO, SGS UK is bound to provide documents about the audit to the system owner. Major- and/or KO non-conformities have to be reported to the SGS UK Certification Body immediately after the IFS Audit, because the IFS Certificate has to be set on status “blocked” in the IFS Database within 2 working days.

9. APPLICATION

The client (see CP) orders SGS UK to perform a certification according to the Standards as described in the Appendix to Certification Contract, including the necessary surveillance visits by SGS UK.

10. CONTRACT DURATION

The validation of the contract begins with the date of the signature of CP. The duration is minimum one (1) year. The contract will extend for an additional year if it is not cancelled three (3) month in advance of the end of the contract.

The termination of the contract has to be written. The parties are entitled to terminate the contract prematurely at the end of the current month for important reasons, e.g. closing of the operations or deregistration of the system.

11. ADDITIONAL PROVISIONS

Modifications and additions to this contract have to be written. Verbally agreed conditions are not valid.

This contract is liable to English law. Any disputes will be decided before the competent court in the United Kingdom.

If any part of this contract is not valid any more the effectiveness of the other requirements will still be valid. The not valid parts have to be changed with valid ones, which will be in the same purpose as the non valid part.

12. IFS INTEGRITY PROGRAMME

The IFS Integrity Program, launched in early 2010, includes different measures to assure the quality of the IFS certification schemes by reviewing audit reports of certified companies and by several measures to analyse and improve the work of certification bodies and auditors. The IFS Integrity Program strengthens the reliability of the IFS schemes by checking the implementation of the IFS standards in practice.

The main procedures of IFS Integrity Program are described in the Annex 4 of the framework agreement; these procedures have been developed in regular meetings of the IFS Quality Assurance Working Group composed of international members. The Annex 4 of the framework agreement has to be signed by all certification bodies having a contract with IFS Management GmbH (IFS CPO). Auditors performing IFS audits have to accept the IFS Integrity Program procedures to assure a qualitative performance of IFS audits.

The IFS Integrity Program mainly works on the following activities:

1. Complaint management:

A detailed complaint management process analyses all necessary information. Retailers or any other interested parties have the right to forward any possible complaint issue to IFS for investigation as part of the Integrity Program. The respective information can be forwarded by e-mail via complaintmanagement@ifs-certification.com or via a complaint form on the IFS website www.ifs-certification.com.

The IFS offices will gather all necessary information in order to investigate the cause of the complaint and to establish if there are deficiencies by certified companies, accredited certification bodies or IFS approved auditors in meeting IFS requirements. Appropriate steps are taken to fully investigate a complaint, which may include a request to a certification body to carry out internal investigations and to provide a statement on the outcome of their investigations to IFS. Finally IFS Quality Assurance Management will decide which approach could be the best to assess and solve the complaint. This might also be to plan an Integrity on-site Check at the IFS certified company to investigatethe case on-site or to organize an Integrity Witness Audit for an IFS approved auditor involved in the complaint case (In this case, an Integrity auditor assesses an IFS auditor during one of his / her next regular IFS audits).

Based on the complaint reason the Integrity on-site Checks will mainly be performed unannounced (announcement 30 minutes before start of the Integrity on-site Check). In some special cases Integrity on-site Checks might also be performed announced (announcement in general about 48 hours before).

2. Risk based approach and monitoring of IFS Quality Assurance

Quality Assurance activities of IFS Integrity Program monitor the entire IFS system by different tools:

In order to care for correct implementation of all procedures described in IFS standards and respective regulative documents IFS Integrity Program carries out regularly office audits at certification bodies (Integrity CB Office Audits). During these Integrity CB Office Audits work performance of IFS approved auditors and of certification bodies is checked by means of several report examples and database analyses. If during these Integrity CB Office Audits special topics have to be clarified, this could also lead to Integrity Witness Audits of IFS approved auditors or to Integrity on-site Checks at companies certified by the respective certification body.

Additionally — taking into account a risk based approach — reports of certified companies are analysed and read by IFS Quality Assurance Management staff. For the risk based approach different criteria havebeen defined by IFS Quality Assurance Working Group. These analyses are an ongoing monitoring procedure of IFS Quality Assurance Management taking into account both economic criteria (e.g. number of issued certificates in certain countries) or quality criteria (e.g. audit results, audit times etc.). As described before, Integrity on-site Checks will mainly be performed unannounced and in some special cases might also be performed announced. Integrity Witness Audits of IFS approved auditors may also be based on this risk based approach analysis of IFS Quality Assurance Management.

Companies having a valid IFS certificate have to accept an unannounced/ announced Integrity on-site Check and to give access and support to the commissioned Integrity auditor. The acceptance of the IFS Integrity Program is part of the regulations of all IFS standards.

Also witnessing IFS approved auditors from certification bodies by commissioned Integrity auditors during regular IFS audits has to be accepted.

Integrity on-site Checks or Integrity Witness Audits and also Integrity CB Office Audits carried out as part of the Integrity Program are conducted by Integrity auditors employed at or commissioned by IFS Management GmbH. Integrity auditors are completely independent of the auditees and the IFS certification bodies.

Sanctions:
If, following a complaint or following the risk based approach / monitoring quality assurance actions, the cause of a deficiency has been found to be the fault of a certification body and / or an auditor, IFS will forward all necessary information anonymously to an independent sanction committee.

The sanction committee, which is made up of a lawyer and participants from industry, retailers and certification bodies, shall make a decision on whether a breach exists and on its severity. Sanctions and / or penalties will be issued to the certification body and / or its auditors if the sanction committee concludes that a breach has been committed.

13. CONTRACT LANGUAGE

This contract has been drafted in English.

14. DATA PROTECTION

The client (see CP) acknowledges that IFS Management GmbH (IFS CPO) receives and stores data about the certified companies as well as about the employees of the certified companies. These data may be displayed in the login area of the IFS Database. More details about IFS Database may be found on IFS webpage: IFS Database.

Privacy Declaration of IFS Management GmbH may be downloaded from IFS webpage: IFS Data Policy.

For SGS's Data Privacy Policy, CP may refer to the following link: SGS Data Policy.

15. ATTACHMENTS

The following documents are part of the Certification Contract. In case of any conflict between the terms of these attachments and the terms of this contract, the regulations of this contract shall prevail. In case of conflicts between regulations in one document to regulations in another document the regulations of documents in the following order are binding:

- Proposal or Commercial contract
- Appendix to Certification Contract
- Descriptions of the respective IFS Standard(s)
- SGS General Conditions of Services and General Conditions for Certification Services

Our General Condicitons of Services and General Conditions for Certification Services are available for download at:

SGS Terms and Conditions

The detailed certification process rules are described in the respective IFS Standards. These are available for download at:
